

Parts

Note: Use only with graphics mounted on 3/16" foamboard or other similar thickness. Can also use a folded edge thinner substrate.

Instructions for Hanging

Step 1

Prepare edges of graphic. Place the graphic on tabletop with one edge at the table edge. Using the AnoQuick holder, run it across the graphic edge, crushing it slightly. **Fig. 1**

Step 2

Starting at one corner, push the holder onto the graphic. Work your way down the holder tapping it down firmly to seat the graphic fully. **Fig. 2**

Step 3

Place cable onto inner channel of Cable Clip. The cable should snap into place. **Fig. 3**

Step 4

Align one end of the Cable Clip with the top channel of the aluminum holder. Insert one round end, then press down on the other round end and slide Cable Clip into rail. **Fig. 4**

Step 5

Push end caps into place. **Fig. 5**

Step 6

Suspend poster. **Fig. 6**

Important note:

Please save and reuse the AnoQuick, Cable Clips, End Caps and MultiClips for future projects.
