

Parts

Note: Use only with graphics mounted on 3/16" foamboard or other similar thickness. Can also use a folded edge thinner substrate.

Instructions for Hanging

Step 1

Prepare edges of graphic by placing the graphic on a tabletop with one edge at the table edge. Using the AnoQuick Holder, run it across the graphic edge, crushing it slightly. **Fig. 1**

Step 2

Starting at one corner, push the holder onto the graphic. Work your way down the holder tapping it down firmly to seat the graphic fully. **Fig. 2**

Step 3

Slide Window Suction Cups into the top rail of the AnoQuick Holder. The AnoQuick Holder is available in either a round or square profile. **Fig. 3&4**

Step 4

Push end caps into place. **Fig. 5**

Step 5

Suspend poster. Make sure glass and suction cups are clean and free of dust and dirt.

Important note:

For best performance when first applied and occasionally thereafter, press the middle of the cup (on the cap) to "burp" extra air out.
